Professional Summary

A developer passionate about creating efficient and innovative software solutions. With over a year of professional experience, primarily working with PHP, I focus on writing clean, scalable code and building user-friendly applications. I enjoy tackling real-world challenges through technology and remain eager to expand my skills and grow through impactful development work.

Areas of Expertise

- Java
- React
- Git, Github
- HTML, CSS, JavaSript
- Kotlin
- Python
- PHP
- MySQL, Firebase, MongoDB
- Arduino

Projects

Digital Sea

An e-commerce website built with PHP, HTML, CSS, and JavaScript.
- Developed dynamic product pages, shopping cart, and checkout functionality using PHP and JavaScript
- Designed responsive front-end layout with HTML and CSS for mobile and desktop users
- Implemented basic **admin panel** for managing product listings and categories

Fondacioni Freskia

A donation website supporting orphans and people in need. Built with PHP, HTML, CSS, and JavaScript.
- Created pages for donations, volunteer information, and foundation projects and details
- Integrated contact and donation submission forms with backend handling in PHP
- Developed separate **admin and user views**, where admins can **add/edit projects**, and manage content
